### **Printers not intended for network use**

Many printers (such as Deskjet printers) are designed for home or possibly small office use and are not supported on traditional networks - these printers have a low duty cycle and are not designed for high-volume network printing. A low duty cycle means they are not intended to print a lot of pages, month after month, as would be expected in a network environment.

They may be supported on home PNA networks using a Jetdirect 70X Home PNA print server; however, this has been discontinued for quite some time. (Home PNA networking uses existing telephone lines to create an in-home network)

HP does not recommend the use of the HP Deskjet, HP Deskjet Plus, HP Deskjet 300, 400, 500, and 600 series printers for high-volume network printing. Other printers not supported on a network included (but are not limited to):

- HP Deskjet 900 series
  - 930c
  - 916c
  - 920c
  - 932c
  - 935c
